

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

In the publication of my "Manual" for 1885, I have spared neither pains nor expense in my effort to give to advertisers a book of real worth.

I have aimed to embody in a condensed form only such information as shall be of practical help to advertisers, with a view to enable them to select papers best calculated to serve their interests, whatever special line of advertising they may wish to pursue.

In discriminating against papers with less than *One Thousand circulation*, and excluding them from this work, it has been done purely in the interest of "general advertisers," who desire a ready reference "Manual," rather than a Newspaper Directory. And to them this book is respectfully dedicated.

CHAS. C. FORD.

INFORMATION FOR ADVERTISERS.

GEOGRAPHICAL ARRANGEMENT.

In the body of this work the States are grouped together in geographical sections, but for ready reference and convenience of advertisers, they are indexed alphabetically, so that any particular State may be readily turned to.

TOWNS AND CITIES

Of every State, Territory, or Province, are arranged in alphabetical order, and under their respective headings, the population is given, together with the names of all publications having not less than 1,000 circulation, their political complexion, class or denomination.

SPECIAL LISTS.

I have arranged with great care seven Special Lists, Daily, Weekly, Sunday, Semi-Monthly and Monthly, Agricultural, Religious, and General Select List, with a view of relieving the advertiser from the perplexity involved in making up a list adapted to any specific line of business. By a careful reference to the above lists one is almost sure to find just the papers calculated for his special use.

ENTERPRISING.

Valuable information concerning a large number of popular and enterprising papers and magazines, can be found upon our advertising pages, index to which appears on page 311.

ESTIMATES.

I shall be pleased to furnish estimates for any responsible advertiser, for any amount of business, to be inserted in any papers published in the United States or Canadas, and invite attention to page 5, "How to obtain an estimate."

HOW TO OBTAIN AN ESTIMATE.

In writing to ascertain the cost of advertising, please observe the following suggestions:

1. When possible, send copy of your advertisement. If you have no printed copy, send it in writing, and I will have it set up and return you printed proof with the estimate.

2. Mention the space you wish it to occupy in LINES or INCHES.

3. Name the papers you wish to use. If undecided on this point, state the cities and towns, or at least the particular section of the country you would like to reach, and I will make up a list and submit it to you for approval.

4. State the length of time you desire it inserted in the different papers.

5. In case you plans are not fully matured, state about the amount of money you purpose expending. By so doing you will enable me to make the most suitable selection for your use, including only the best and cheapest papers to cover the ground.

Commencing with the November issue, 1885, there will be incorporated into our subscription list, the subscription lists of both *Home Guests* and *Happy Days*, published in this city, now suspended, making an **Aggregate Circulation of over 50,000,** and in reality **3 papers for the price of one.**

THE FOLLOWING FACTS RELATIVE TO THE MERITS OF THE

CHICAGO EVENING JOURNAL.

AVERAGE CIRCULATION, 18,000.

As an advertising medium, are respectfully submitted for the consideration of the intelligent and judicious advertiser.

THE DAILY EVENING JOURNAL

Established in 1844, is the leading five-cent Republican Afternoon paper in the West and Northwest. It issues both a three and five o'clock edition.

It commands a large street sale, is delivered by carriers in all parts of Chicago, is the only evening paper for sale on all the lines of railroad leaving Chicago, and is a morning paper to many places in the surrounding States, which are reached in the morning by trains which leave Chicago the previous evening.

It is a carefully edited newspaper, free from all sensational and objectionable literature. Its columns are clean and its tone elevated. It is a daily visitor in the homes of bankers, merchants, lawyers, doctors, ministers and other business and professional men and is emphatically THE FAMILY PAPER of this section of the country.

CHICAGO WEEKLY JOURNAL.

CIRCULATION OVER 23,000.

It is the oldest Weekly newspaper published in Chicago, and is issued in connection with the Chicago EVENING JOURNAL, thereby ensuring to its readers a superior class of Telegraphic, Financial, Market and Miscellaneous News, in addition to the regular quota of stock and Agricultural Matter, specially prepared and edited by able and experienced journalists. Unlike many similar publications the WEEKLY JOURNAL is gotten up with a special view to meet the requirements of the Farmer and Live Stock Dealer.

Its advertising columns are closed to *objectionable, medical and fraudulent advertisements*, thus protecting legitimate advertisers and promoting the best interests of its patrons.

The paper circulates among the better and wealthier class of farmers, and possesses all the requirements of a valuable advertising medium for reaching those who have money to spend, and who can afford to buy good goods at fair prices.

Estimates on cost of advertising space, and sample copies of the paper, may be had on application to any responsible advertising agent, or to

FACTS FOR ADVERTISERS.

MIRROR AND FARMER.

The MIRROR AND FARMER, published at Manchester, N. H., established in 1850, has a larger circulation than any other weekly agricultural and family paper published in New England except one. Since its enlargement in 1882 it has gained more than 10,000, and its circulation is now over 23,000 and steadily increasing, so that it is nearly certain to reach 25,000 before the end of the year. It employs no traveling agents. Every person who subscribes for it does so because he or she wants it, and pays for it in advance, a fact which makes it an exception to every other of its class in the Eastern States. It circulates chiefly in the four northern states of New England, but reaches patrons in every other northern and western state clear to the Pacific coast. Its readers number more than a hundred thousand. They read it carefully and thoroughly, and believe in it. They include not only the intelligent, progressive, well-to-do farmers, but the most prosperous and enterprising citizens in all callings,—professional and business men, merchants and tradesmen,—who have many wants and the money to pay for what they need. They buy freely and pay promptly.

The advertising rates of the MIRROR AND FARMER are, in proportion to its circulation and influence, lower than those of any other agricultural paper in the country, being but 14 cents each agate line, $1.96 an inch, for each insertion, with liberal discounts for large orders. If you have anything to sell for money, tell the readers of the MIRROR about it; it will pay.

23,718.

The average circulation of the MIRROR AND FARMER for the past four months has been

23,718 copies each week.

THE MANCHESTER

DAILY MIRROR AND AMERICAN,

A paper which was established in 1850 and has grown up with the city, is the leading paper in it, and is taken by all the people who have money to spend in this thriving place of thirty-eight thousand inhabitants, whose cotton mills produce two hundred and twenty-three miles of cloth every day, and whose mechanics build fifteen locomotives each month and fifty steam fire-engines a year, and an endless variety of other products of skill and industry. The manufacturing corporations employ eleven thousand operatives and pay over $400,000 in monthly wages. As a local advertising medium the DAILY MIRROR surpasses all others published here or taken in the city.

FARM JOURNAL,

PHILADELPHIA. . CHICAGO.

DECEMBER, 1885.

OF THIS NUMBER OVER

500,000 COPIES

will be printed. This is a large number. The edition will probably be divided, with 300,000 for Eastern circulation and 200,000 for Western circulation. The rate for the entire edition will be **$2.50 PER LINE.**

If less than half a million copies be printed, no charge whatever will be made. (No edition but that for December will be divided into Eastern and Western).

1886.

THE RATE FOR

JANUARY, FEBRUARY, MARCH, APRIL,

will be **$1.50 PER LINE.** Each edition will be more than

250,000 COPIES

If less than above, advertisements will be inserted free. The rate for **MAY** will be **$1.25 PER LINE.** I do not know how many I shall print, but a very large number. The rate for **JUNE, JULY, AUGUST, SEPTEMBER, OCTOBER, NOVEMBER,** will be **$1.00 per line.** How many Copies I shall print will depend on how many subscribers I have at those times. I shall print enough to make it pay my advertisers at the rate charged.

MY MOTTO IS

FORWARD!

and I do not propose to stand and shiver because the weather is rough and the business skies **have been** a little bluish in their tints. I mean by this, that my subscription list is to go on increasing. Times are going to be good, and that soon, and the **Farm Journal** is going to help make them so.

☞ The above rates, as you know very well, are only about one-half as high as those of the average agricultural paper. I guarantee my readers against swindling advertisers, and this doubles the value of this medium.

BUSINESS CLASSIFIED. The same rate will be charged for cards under this head as elsewhere in the paper. Respectfully,

WILMER ATKINSON,
Editor and Proprietor.

FARM AND FIRESIDE,

SPRINGFIELD, OHIO.

The only Agricultural Journal in the United States owning a complete outfit, including Building, Presses, Type, Electrotype Foundry, etc., etc.

Our new Publishing House. Erected for, and Used Exclusively for our Business.

153,000 COPIES,

WHAT DOES IT MEAN?

It is almost impossible for any one to get a proper idea of the enormous number of papers meant by 153,000 Copies.

It represents 125 miles of paper, and if the sheets were piled on top of each other it would make a monument almost three times as high as ordinary four-story buildings.

It would cost to print and mail 153,000 circulars about three thousand dollars ($3,000), while a column advertisement in FARM AND FIRESIDE will cost only about $160, and an inch card would cost only $14.

The circular would cost about two cents for each person reached. A column in FARM AND FIRESIDE would cost only one-tenth of a cent for each person reached, and an inch card will cost only one hundredth of a cent for each person.

The circular will be thrown away. FARM AND FIRESIDE will be preserved for at least two weeks, and a large portion of them filed away for future reference.

FARM AND FIRESIDE has paid-in-advance subscribers at **20,674** post-offices (numbering from one to 305 subscribers at each post-office), as follows:

THE AMERICAN RURAL HOME.

ROCHESTER, N. Y.

Last Year's Record,

A WEEKLY AVERAGE OF 33,804.

LOOK AT THE PROOF AS FURNISHED BY THE POST OFFICE DEPARTMENT:

STATE OF NEW YORK, } ss:
County of Monroe, }

W. Seward Whittlesey being duly sworn says, that he is Assistant Postmaster of the City of Rochester in said county and State; that the Rural Home Co. (limited), mailed at the post office in said city during the year 1884, one hundred and forty-six thousand four hundred and eighty-seven (146,487) pounds of the AMERICAN RURAL HOME newspaper and paid the postage thereon, amounting to the sum of Two Thousand Nine Hundred and Twenty-nine Dollars and Seventy-four cents ($2,929.74). W. S. WHTTLESEY.

Subscribed and sworn to before me this 28th day of January, 1885.

[L. S.] WILLIS G. MITCHELL, Notary Public.

In the foregoing affidavit the Assistant Postmaster swears to the fact that 146,487 pounds of AMERICAN RURAL HOMES passed through the Rochester Post Office last year. As twelve copies of the RURAL weigh just a pound (allowing for wrappers and paste), we find that 1,757,844 copies of the paper were mailed at the Rochester Post Office last year. Dividing this number by fifty-two we have an average weekly circulation of 33,804.

This circulation, with the rate charged for display advertising—25 cents per Agate line—makes the AMERICAN RURAL HOME the cheapest advertising medium in the country.

THE ATTENTION OF SEEDSMEN AND OTHER ADVERTISERS IS RESPECTFULLY CALLED TO THE FACTS SET FORTH ABOVE.

Address, RURAL HOME CO., (Limited), Rochester, N. Y.

CIRCULATION, 100,000! WEEKLY FOR 1885.

THE AMERICAN RURAL HOME

VOL. 15, NO. 31. WHOLE NO. 760. ROCHESTER, N. Y., SATURDAY, AUGUST 1, 1885.

HOW STORMS GROW.

SOME GREAT NATURAL OPERATIONS SIMPLY EXPLAINED.

The Law Relating to the Terrible Cyclones.

It was stated in a river-bank where the water is unusually high, he will see answer's one edition and more or less complete which grow, which either stand nearly in the same place or go slowly drifting by, down the stream. These whirlpools are somewhat deceptive, but a perfect one may easily be made by pouring water into a funnel.

In the whirlpools each atom of water takes a spiral course, that is, more reflected, by a whirl will gradually approach the center, decreasing all the time its distance from it, but at the same time going faster and faster, —increasing its velocity—till little particle of wood, or fragment of chaff can be set going upon the water, and the facts concerning this direction and velocity of motion, can also be easily observed.

Let us suppose that we have a stationary whirlpool in a river, and that a fish,—very small as compared to the size of the whirl,—attempts to pass through it; from what direction will the whirl strike him as he passes through?

Let us suppose that the whirl is such that if one stood in the middle every particle of water, passing in front of him, would go from the right to the left. That is, the direction is contrary to that of the hands of a watch, facing them up. Therefore, starting would, at certain points, take the

DIRECTION OF RESISTANCE

in the figure, and the direction from which they would strike the fish would depend on their path through the whirl. If he passed through the center in the direction of the large arrow a they would strike him from the south, cause he would have a calm space, and then he would be struck from the north; if he passed north of the center, b, the opposite direction would be NW., W., SW. If he should pass through it in any other direction, he would, in corresponding changes in the direction of the currents striking him.

If the fish should stand still and the whirl pool should move, there would be similar changes in direction. If the fish were at the point c, and the whirlpool moved east, he would experience first a S., then a S SW., and so on, through S., SW., W., NW., N., NE., E., SE., &c., the currents striking the fish, as I said previously, would be the same as if he had moved in a contrary direction, the whirl being stationary. This is just the position of nearly everybody in these days.

HOW THEY HAPPEN IN THE AIR.

Where the whirls are in the great oceans of the atmosphere and we are the fish—confined in this case to the horizon, however, except when we go up in a balloon. The fish current we inhabit is like a sheet of air one thickness.

Where are the rare bubbles atmosphere? For a complete view, fully in the usual sheet, which is to be found now and then in the form of cyclones, or tornadoes, and the large ones which are considered to vary in a direction against that of the hands of the watch, by forces arising from the rotation of the earth. Where the arrows in the diagram, b, this representing one of the two possible directions for the water which would cause the only possible motion for large air-whirls, which storm are usually con-

CENTRIPETAL FORCE,

which effects over the water, this is "pull" towards the it comes on, this thermometer rises and the barometer falls. At its center the thermometer is at its highest, and the barometer at its lowest.

Rain falls in the vicinity of its center, at anywhere in that cyclone.

From these facts it happens that the storm comes apparently from the west, and that the direction of the wind is nearly not the direction from which the storm comes. The storm-area travels eastward and takes its system of winds with it. It is with us and the cyclone as it was with the fish, and the whirlpool passing over it. The whirlwind may pass east and the fish may be confined, a current from S., SE., SW., to west from it, directly contrary to the direction of motion of the whirl. The same in lives of the storm-area and its winds. The storm

MAY COME DIRECTLY FROM THE WEST

and we may have the wind from some other quarter. The wind may even have left the storm.

If it were not for variations like, in part to the peculiarities of individual cyclones, and in part to the surroundings of the storm, the following rules would be reliable at 8 p. m. they are on the whole correct:

I. If the wind is from the South and the barometer falls the storm will pass over us. It will grow warmer and cloudier and may rain.

II. If the wind is in the Southwest the storm will pass to the North of us.

III. If the wind is in the Northwest the storm will pass to the South of us.

IV. If the wind is Northerly, the storm has already passed and the weather is going to be fairer.

In general, if we stand with back to the wind, the storm center is to the left of us and somewhat in front.

These rules will, of course, work equally in northern or other winds of local origin.

The facts, as given, have been learned by observation, and sometimes by sounding the upper currents of the air by means of balloons. The minute details of the cyclones, into which I have not entered, are now pretty well understood. We are also well advanced in the study of the causes of the cyclones and the causes of their various features, but these are more difficult subjects and one to which there is yet much explanation of light.

WHY MONEY IS SCARCE IN THE SOUTH.

BY A. KING.

By the Cotton and Rice Crop.

In almost every newspaper one takes up he finds that it is stated that silver is not wanted, that there is no demand for it, &c. From personal observation and the letters of correspondents, I would state positively that the mints of coin and the large towns it is not allowed to circulate, as for that matter, any money at all. To illustrate: the largest part of the people are small crop growers, farmers. They have to "do almost their entire business through the country storekeeper. If he is known it is bad enough; if unknown it is as much worse for the farmer. His motive with the former has to sell it must go to the store and get what he can pay for goods. If he lives a laborer he has no money to pay him and gives him an order on "the store." Here again the laborer gets no money. From quality or quantity make no difference; trade it is, and trade he must take or nothing. It here also to the large farmer as a planter.

Yours, M.D., SOUTHERN.

Experience is the answer of years.—"Experience doth not always teach." Experience is the answer of years.—"Experience doth not always teach." Experience is the answer of years.—"Experience doth not always teach."

WHEN TO MARKET CROPS.

We are asked by correspondents whether farmers and others will find the crops of grain or meat as it is ready for market, or hold in anticipation of a rise. Also, whether there is any prospect of a future rise in hogs and cattle.

We always hesitate about giving advice to farmers as to the best time to market their crops. The future is very uncertain, and the effort often fail in their calculations of what that future is to be. We have always said that, as a rule, the best time to market crops is when they are ready for market, and in good condition for transporting; production, practice in fairly open and fair crops will sell for enough to meet the cost of growing them. There are, of course, exceptions in the future market, as much loss in shrinkage and waste of grain in store, and loss of interest, that these items eat at best, we think farmers would gain by marketing their crops as soon as they are, without accepting other important truth.

But this year may prove an exceptional year. Reports from all over the world seem to agree that the wheat crop, this year, will be short. Unless there shall be great change in reports before the winnowing of 1885 is all secured and threshed, there must be a deficiency in the world's supply that will surprise, although hope that "prospect" pains. To-day's dispatch reports says that the Chicago market is 2c higher for land, and Russia is the great competitor in wheat, in the markets of the world. So many of the States of our Union, which are large in stock or in stack, the continued wet weather in cutting, the rains, thus infecting, and factor, the proportion of marketable wheat.

These considerations, taken with this will probably somewhat reduce the ordinary demand. The hard times prevailing all over the world will probably have the effect to diminish the consumption of breadstuffs which, I observe, out of full employment are often compelled to exhaust on bread made from the cheaper grains, and, unless there are a great unexpected reports, there will be no dispersion next.

Another point is to be considered, in the

This magazine is strongly endorsed by Hon. John Eaton, U. S. Commissioner of Education, Hon. J. W. Dickinson, Rev. J. L. M. Curry, Hon. T. W. Bicknell, and hundreds of the School Superintendents and educational authorities throughout the country, from Maine to Colorado.

It is an advertising medium of *unusual* value.

One advertiser reports, "I get better returns from the 'POPULAR EDUCATOR' than from many magazines of double the circulation." Another states that over one hundred orders with money enclosed was received in one week, in response to my advertisement in the POPULAR EDUCATOR.

This magazine has represented on its subscription list Superintendents, Principals, School Commissioners and Directors, people who do the ACTUAL BUYING of educational and school supplies.

DISPLAY NOTICES 80 CENTS PER LINE. READING NOTICES $1.50 PER LINE

All Notices are Measured Agate. Fourteen Lines Make an Inch.

CUTS—SELECTED POSITIONS. We make no extra charge for cuts or selected positions; hence, those who send their favors earliest will always secure "top of column" or "next reading matter," provided such requests are made in the order.

OUR MEASURE. Our columns are 13½ picas, (2¼ inches wide,) and 17½ inches long. There are five columns to a page and eight pages to the paper.

DATE OF ISSUE. We go to press on the 15th of every month for the succeeding month, all copy must therefore be in our hands positively not later than on the morning of the 15th day of the month preceding the month of publication.

OUR SUPPLEMENTS. We frequently find it necessary to issue supplements of two and four pages, the same size as the page of the paper. All matter received during the ten days previous to going to press is usually placed on the supplement when published. These supplements, we would state, are not like the ordinary "extra sheets," got out for the mere purpose of squeezing in ads., but are of equal, and sometimes more, value to the advertiser than the paper proper, on account of the large amount of reading matter they carry and the few ads. WE WANT THE EARTH

To yield bigger returns to our old subscribers and friends during 1886 than ever before. And to that end the Publishers of the AMERICAN AGRICULTURIST are spendiag more money than during any previous year in making its columns instructive and valuable.

WHY the American Agriculturist is better now than ever before.

First:—The *American Agriculturist* has been enlarged and vastly improved in all its various departments. It is now printed on super-calendered tinted paper with a glaze and finish which give clearness and distinctness to the type and illustrations.

Second:—In addition to Dr. George Thurber and the other life-long Editors and contributers who have aided in making the Journal what it is to-day, new names have been added to our Editorial force, which will be still further strengthened with fresh acquisitions.

Third:—Joseph Harris, the founder of the "Genesee Farmer," author of "Walks and Talks on the Farm," etc., and whose agricultural writings have made him famous on both continents, is now one of the active Editors of the *American Agriculturist*.

Fourth:—The very note-worthy improvements made in the *American Agriculturist* since 1885, embrace a complete transformation in the character of the illustrations. New and talented Artists have been employed, until the engravings and illustrations in the *American Agriculturist* have become, during the past year and a half, more numerous and far superior to those appearing in any similar publication. The *American Agriculturist* has for years been the recognized authority in all matters pertaining to agriculture; it has now become the first **Illustrated** Agricultural Journal of the world.

Price $1.50 a Year. Single Number 15 Cents.

FIRST. They are taken by the most cultivated, liberal and enterprising class of people.
SECOND. They are *thoroughly read* and usually *carefully preserved*.
THIRD. The number of readers is not limited to the members of one family, but frequently includes a whole neighborhood.
FOURTH. The advertising pages are few, and the advertisements being attractively displayed and conspicuously located, are more likely to arrest the attention of the readers.

A TESTIMONIAL.

One testimonial such as here given counts for more than a hundred of the usual kind.

MR. J. WALTER THOMPSON, 39 Park Row. NEW YORK, April 17th, 1884.

Dear Sir: In making our appropriation for the coming season it forcibly strikes us that if you can make a yearly sale of over $500,000 worth of goods on an article that was unknown in the maket three years ago, which you have done, by an annual expenditure of only $20,000 in advertising the same, it makes a very good showing, and it is no wonder we should give you the entire control of our advertising, both magazine and newspaper. It is evident to us that you understand your business. Will let you know about our next appropriation in a few days. Yours truly,

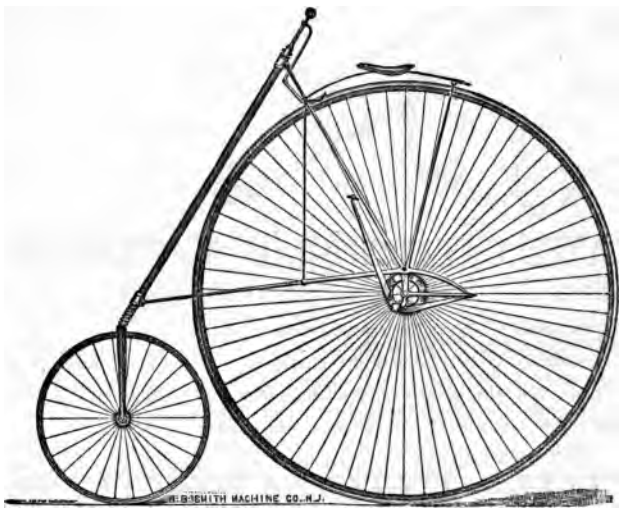

SHAEN & CHRISTIE.

THE MECHANIC.

A Monthly Journal devoted to Mechanics, Science and Literature.

Contains illustrations of late inventions and descriptions of H. B. Smith's celebrated woodworking machinery.

The MECHANIC is also the accepted organ for the American Star Bicycle.

A practical roadster, safe from headers or other dangerous falls.

The means of propulsion insure a continuous motion without dead centers, a requisite condition for both speed and power.

The new flat-seated tires are a great improvement, and the new square grooved rim forms a wheel that will not buckle.

A "reformed crank rider" says, "In strength, safety, control, driving leverage, ease of motion, and coasting the Star leads all Bicycles! while its positive action, quickness in steering and economy in pedaling are excluded from any other vehicle.

The workmanship and entire practicability of each and every machine are fully guaranteed.

MILTON GEORGE, Publisher.

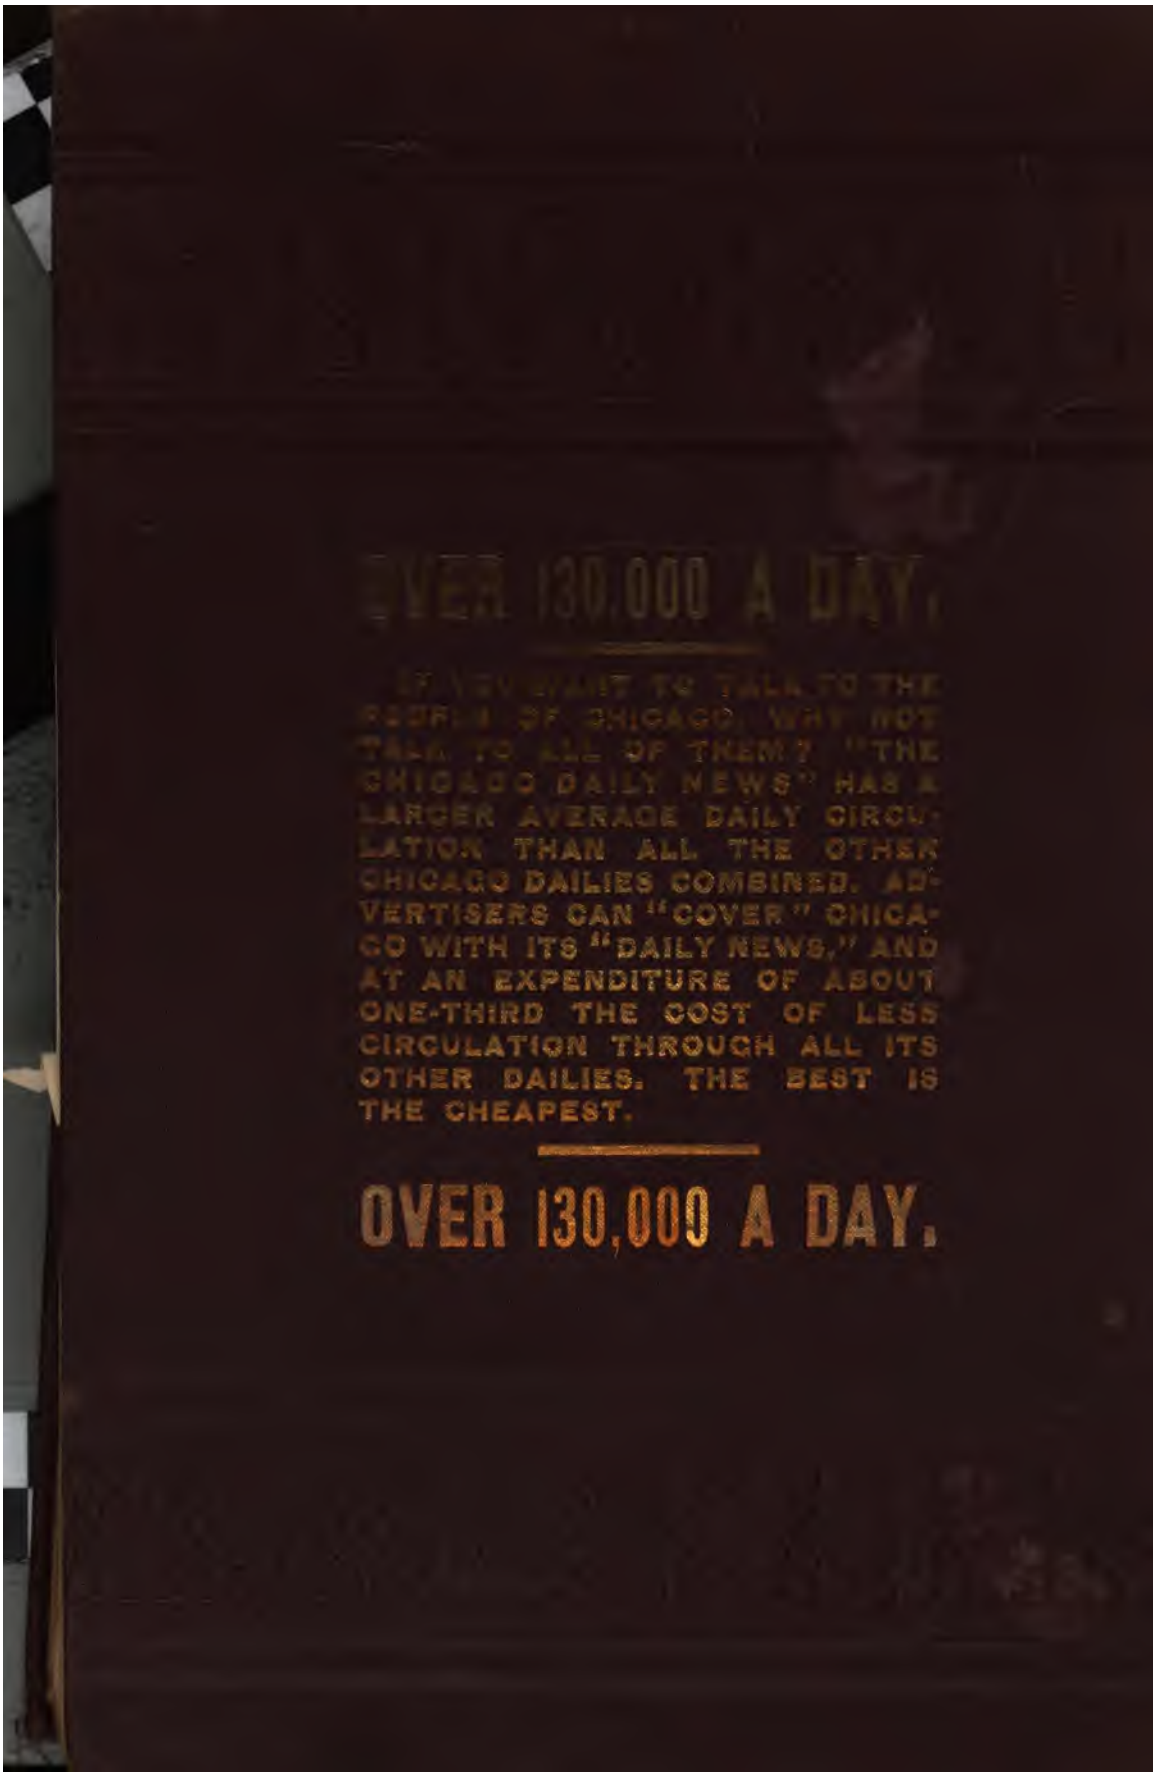

Eastern Office: 21 PARK ROW, NEW YORK.

This Journal has an immense and influential circulation, covering all parts of the United States, and to some extent in foreign countries. It displays its advertising carefully, and classifies each with the department to which it belongs, so that, although it carries an immense amount of advertising, each advertisement, no matter how small, is placed in a position where it will be readily seen. Its advertising rates are very low in proportion to circulation, while the general testimony of advertisers is that it is the best medium for reaching the Agricultural classes.

Schedule of Advertising Rates: (Standard of Measure, Agate Type, 14 lines to the inch): On transient and ordinary advertisements not exceeding 500 lines, per line each insertion, **25c.**; 500 lines or more, single contract, to be used within one year from first insertion, per line, **20c.**; 1,000 lines or more, as above, per line, **18c.**

Only reliable advertisements inserted. No preferred space given. We give no discount from the above.
